

Project Requirements

Summary

A fully compliant **B2B Pharmacy Platform** with:

- Distributor-controlled operations
- Batch & expiry tracking (critical for pharma)
- GST billing integration
- Credit & payment management
- Returns & notifications

1. Project Overview

A **B2B Pharmacy Platform** connecting:

- **Distributors (Suppliers)**
- **Retailers (Pharmacies / Buyers)**

Purpose:

- Enable retailers to **browse, order, and manage medicines**
 - Provide **credit system, promotions, and distributor-controlled operations**
 - Ensure **compliance with pharma regulations (GST, batch, expiry)**
-

2. User Roles

2.1 Distributor (Supplier + Platform Owner)

Responsibilities:

- Approve/reject retailer registrations
- Manage products, inventory, pricing
- Set credit limits and promotions
- Monitor orders, payments, and returns (phase 2)

Features:

- Product & inventory management
 - Retailer management
 - Order & payment tracking
 - Analytics dashboard
-

2.2 Retailer (Pharmacy / Buyer)**Features:**

- Browse/search medicines
 - Place bulk orders
 - Use credit (if approved)
 - Track orders, payments, and returns
 - Credit limit configurable
-

3. Core Features

3.1 Product & Catalog Management

- Product details:
 - Name, description, images
 - Price
 - HSN code (for GST)
 - Category management
 - Company wise
 - Tablet, Capsule, insulin
 - Health devices
 - Search & filtering
 - Bulk pricing support
-

3.2 Inventory, Batch & Expiry Management

- Batch-level tracking:
 - Batch number
 - Manufacturing date
 - Expiry date
 - FIFO (First Expiry First Out) logic
 - Prevent sale of expired products
 - Low stock alerts
 - Near-expiry alerts
-

3.3 Order Management

- Bulk order placement
 - Order lifecycle:
 - Pending
 - Approved/Accept
 - Packed
 - Dispatched
 - Out for delivery
 - Delivered
 - Order history tracking
 - ReOrder
-

3.4 Credit Management System

- Request
 - Credit limit per retailer
 - Track:
 - Used credit
 - Remaining credit
 - Outstanding balance
 - Credit usage during checkout
-

3.5 Payment & Billing System

- Payment gateway integration
- Payment options:
 - Full payment

- Partial (credit)
- Payment tracking

GST Billing (Integrated)

- Auto GST calculation
 - GST-compliant invoices
 - Invoice download (PDF)
 - GST fields:
 - GSTIN
 - HSN codes
 - Tax reporting
-

3.6 Promotions & Discount Management

- Cash discounts
 - Scheme-based offers
 - Bulk discounts
 - Configurable by distributor
-

3.7 Return & Refund Management

- Retailer can request returns
 - Distributor approval/rejection
 - Return reasons:
 - Damaged
 - Expired
 - Incorrect product
 - Refund methods:
 - Credit note
 - Payment refund
-

3.8 Notification System

- Channels:
 - Email
 - SMS + whatsapp message

- Alerts for:
 - Order confirmation
 - Payment reminders
 - Credit usage
 - Delivery updates
 - Return status
-

3.9 Reporting & Analytics

- Sales reports
 - Product performance
 - Retailer-wise analytics
 - Outstanding payments report
 - Inventory reports
-

4. Platform Features

4.1 User Flow

1. Retailer Registration
 2. Distributor Approval
 3. Login
 4. Browse catalog
 5. Place order
 6. Payment / credit usage
 7. Delivery & tracking
 8. Returns (if needed)
-

4.2 Dashboards

Distributor Dashboard

- Retailer approvals
- Inventory & batch tracking
- Orders & returns
- Revenue & tax reports

- Outstanding payments

Retailer Dashboard

- Orders & tracking
 - Credit usage
 - Payment status
 - Return requests
-

5. Business Logic

- Credit limit enforcement
 - FIFO inventory usage
 - GST-compliant billing
 - Batch-based inventory deduction
 - Order-level pricing & discounts
 - Payment reconciliation
-

6. Platform Capabilities

- Scalable inventory (100 → 10,000+ SKUs)
 - Secure authentication
 - Role-based access
 - Data backup & security
-

7. Suggested Tech Stack

- Frontend: React / Next.js
- Backend: Node.js / Django
- Database: PostgreSQL
- Payment: Razorpay / Stripe
- Hosting: AWS / Vercel
